

I am a CT. resident and would like to voice my deepest opposition to adding Tolls to the CT. roads.

I am old enough to remember when CT. had tolls and removed them. I am therefore old enough to also remember when CT. didn't have a state income tax until Gov. Weicker was able to get an income tax approved on the conditions that it be "temporary" until our deficit was paid off.

Well, our deficit was paid off, the state then ran a surplus, and we never got rid of the income tax OR the property tax that was also supposed to be removed/reduced. The state went on to find new ways to spend their new found tax surplus and now we are back in a terrible financial state. The state needs to start running like I run my house, if I don't have the money, I don't spend it. Therefore I do not want to see any new form of state "revenue".

Sincerely,
